

VINDICATIONS

Having sufficiently described my invention I consider it as a novelty and therefore I lay claim

5 as of my exclusive property what is contained in the following clause:

1.- A system for water discharges in toilet tanks which is formed by.

A valve which has a flexible ringed hose.

An outside threaded couple

10 A conic rubber gasket to seal the tank

A nut to attach the system to the tank

A bowl like gasket to seal the tank to the bowl

A band to seal the hose to the couple

A cable or wire to pull the hose

15 A stick and a handle to pull the cable.

2.- A dispositive for water discharges in toilet tanks as defined in claim 1,

characterized by having a couple which has been reduced in its inner diameter from 10% to 20%

less than the hose diameter to make the discharge quicker and effective.

20

3.- A dispositive for water discharges in toilet tanks as defined in claim 1. characterized for

having a screw that has a rod with a slight angle along with a ring in the upper section that is

used to guide the cable that bends the hose; this screw is attaching the tank to the bowl in the

right side and guiding the cable through the ring.
